Objective

Full stack developer, pursuing a Bachelors of Science in Computer Science and looking for career opportunities. Passionate about building clean, user friendly and efficient web pages. Curious, organized, detail oriented and determined. Always interested in learning new technologies and languages.

Education

Western Governors University - *B.S. Computer Science*   Anticipated: Dec 2023

Projects

Class Roster System
- Created a CLI application using C++ that prints all students' info, invalid email addresses, average number of days, and students within a certain degree program.

Personal Portfolio
- Built a responsive, personal portfolio using HTML, CSS, and JavaScript that showcases projects and allows users to contact me using a form. Uses JavaScript to display a hamburger menu when the screen is less than 1000px.

Random Quote Generator
- Programmed an application that generates quotes using the Random Quote API and JavaScript. Uses JavaScript to manipulate the HTML on the page to display quotes.

Skills

Languages: HTML5, CSS3, JavaScript, C++
Tools: WordPress, Git, Github, Visual Studio Code, XCode, Excel

Work Experience

Material Handler II - *QuidelOrtho Diagnostics* - San Diego, CA   July 2020 - Present
- Lead shipper, in charge of all outgoing shipments from the QuidelOrtho facility.
- Pay close attention to detail by following IATA guidelines to ensure hazardous materials are properly labeled for both international and domestic shipments.
- Communicate with both courier services and customers to guarantee expected deliveries on time.
